Magnum Supps — Product Page CRO (Conversion Rate Optimization) Audit

Pages audited (scraped live):

- **Magnum Quattro** (protein) — `/products/magnum-quattro-original-cad`
 - **Magnum Limitless** (pre-workout) — `/products/magnum-limitless-cad`
 - **Beach Body Igniter Stack** (bundle) — `/products/beach-body-igniter-stack-cad`
-

Executive Summary — Top 3 revenue-impacting gaps

1. **The flagship bundle is unbuyable.** The Beach Body Igniter Stack PDP (Product Detail Page) renders with **every variant flagged “sold out or unavailable” and the Add-to-Cart button disabled**, while still advertising a 30% discount (\$179.97 → \$125.98). Your highest-AOV (Average Order Value) product page converts at zero. Meanwhile 3 of 5 Quattro flavors and 1 of 4 Limitless flavors are also sold out with no waitlist/back-in-stock capture. This is pure leaked demand.
 2. **Subscription is buried and defaulted off.** Magnum offers 15% subscribe-and-save, but the PDP **defaults to “One-time purchase”** and the option is a plain radio with no value framing. Every benchmark that does this well — Ghost, PVL, Transparent Labs — **pre-selects Subscribe & Save** and surrounds it with flexibility copy (“cancel or pause anytime, 30 days”). You are defaulting customers into your worst LTV (Lifetime Value) path.
 3. **Trust and proof are thin vs. the category.** Quattro shows free shipping and a 4.79/43-review star block, but **no money-back guarantee, no third-party/NSF (National Sanitation Foundation) testing badge, and no per-serving cost framing.** Transparent Labs surfaces 4,965 reviews + clinically-dosed + third-party tested above the fold; 1st Phorm shows 37,340 reviews + a money-back guarantee; BPN (Bare Performance Nutrition) shows NSF + GMP (Good Manufacturing Practices) + third-party. Magnum’s review counts (43, 15) are an order of magnitude behind and the trust scaffolding around them is missing.
-

PDP Structure Comparison Table

Element	Magnum (Quattro/Lim- itless)	Ghost	BPN	Transparent Labs	1st Phorm	Legion
Gallery images	~11 (Quattro), modal zoom, no video	many + swatch- es	many	28 + 2 videos	video	<i>not scraped</i>
Video on PDP	No	No	No	Yes (2)	Yes	<i>n/s</i>
Subscribe & Save	Yes 15% — defaults to one-time	Yes 25% — default ON	Yes 25%	Yes 10% — default ON + flexibility copy	Yes	<i>n/s (known: yes)</i>
Ingredient/facts	facts as im- age , accordion	supple- ment facts	nutrition facts	supplement facts + “clini- cally dosed” callouts	tabbed	<i>n/s</i>
Third-party / NSF badge	No	None visible	Yes NSF + GMP + 3rd-party	Yes 3rd-par- ty + clinically dosed	None (money- back instead)	<i>n/s</i>
Money-back guarantee	No	None visible	None visible	Yes	Yes	<i>n/s</i>
Sticky ATC (Add to Cart)	Yes (button only, no price/thumb)	Yes	Yes	Yes	Yes	<i>n/s</i>
Bundle / cross- sell	cross-sell row, not framed as “stack”	Build Your Bundle	Complete Your Stack	Complete Your Stack (w/ ratings)	No	<i>n/s</i>
Reviews visible ATF (Above the Fold)	Yes star block (43 / 15 reviews)	widget (Yotpo)	Yes 4.9	Yes 4,965 reviews	Yes 37,340 reviews	<i>n/s</i>
Per-serving cost framing	No	No	No	partial	No	<i>n/s</i>

Element	Magnum (Quattro/Lim- itless)	Ghost	BPN	Transparent Labs	1st Phorm	Legion
Education sections	Features / Use / Directions / Ingredients	Supp Facts	How to use / Ingredients / Reviews	Why / Benefits / How To Use / Science	Desc / Ingredients / How To Use / What To Avoid / FAQ (Fre- quently Asked Questions) / Research	<i>n/s (known: heavy)</i>

Section-by-Section Findings

1. ABOVE THE FOLD

Current State: Quattro shows gallery (modal zoom), title, size + flavor swatch selectors, a 4.79★/43-review block near the top, quantity stepper, subscription radios (defaulting to one-time), and “Add to cart.” Limitless is the same minus the size dimension.

Verdict: IMPROVE

Why: The bones are right — star rating ATF and swatch selectors are good. But the subscription default leaks LTV, sold-out flavor swatches dead-end the buyer, and there’s no guarantee/trust microcopy near the CTA (Call to Action) to reduce purchase anxiety.

Benchmark: Transparent Labs pre-selects Subscribe & Save and stacks “Save 10% · Free Shipping · Cancel or pause anytime · 30 days” right at the selector.

Recommended Action: Default the subscription radio to Subscribe & Save with the savings and flexibility spelled out; add a one-line guarantee + free-shipping-threshold strip directly under the ATC.

2. PRODUCT IMAGE GALLERY

Current State: ~11 product images with a working zoom modal (“Open media in modal”), thumbnail rail, left/right slide. **Zero video** on any Magnum PDP.

Verdict: ADD (video) / KEEP (gallery mechanics)

Why: Supplement buyers want to see texture, mixability, and scoop size. Static images can't show "zero clumping / mixes clean," which is a top protein objection.

Benchmark: Transparent Labs runs 2 videos in-gallery; HD Muscle and 1st Phorm both embed product video.

Recommended Action: Add one 10–15s mixability/lifestyle video as gallery slide 2 on Quattro and Limitless.

3. BENEFIT / HOOK SECTION

Current State: Quattro leads into "Product Features / Intended Use / Directions" — solid but **feature-first** ("4 Protein Isolate Blend, 30g protein, bromelain added"). Benefits ("zero gas or bloating," "perfect for lactose sensitivities") are buried inside the feature list.

Verdict: IMPROVE

Why: The strongest differentiator — gut-friendly, no bloat — is Magnum's real hook and it's hidden in a spec bullet.

Benchmark: PVL leads Iso Cleaar with an outcome line ("Light doesn't mean less — 20g protein, 0g sugar, 80 calories, no dairy").

Recommended Action: Add 3–4 outcome-led benefit icons/bullets immediately below the ATF: "Zero bloat · 30g 4-source protein · Lactose-friendly · Kosher & gluten-free."

4. INGREDIENT TRANSPARENCY

Current State: Supplement facts appear to be served as **flat images** (13 detected), inside an accordion. No clinically-dosed callouts, no per-ingredient research notes, no third-party seal.

Verdict: IMPROVE

Why: Transparency is now table-stakes and a conversion lever for the informed lifter segment. An image-only facts panel isn't scannable or mobile-friendly and signals less rigor than competitors.

Benchmark: Transparent Labs labels doses "clinically dosed" with third-party testing; BPN shows NSF + GMP.

Recommended Action: Add 2–3 key-ingredient callout cards (ingredient, dose, one-line “why”) above the facts image; if Magnum has any third-party/lab testing, badge it on the PDP.

5. SOCIAL PROOF

Current State: Star rating + count visible ATF (good), review widget below. Counts are low (Quattro 43, Limitless 15). No UGC (User-Generated Content) photos, Q&A (Questions and Answers), or video testimonials detected.

Verdict: IMPROVE

Why: 15–43 reviews next to competitors’ thousands is a credibility gap. Low counts also mean no photo/UGC proof, which protein buyers rely on.

Benchmark: 1st Phorm 37,340 reviews; Transparent Labs 4,965; BPN 4.9 across thousands.

Recommended Action: Run a post-purchase review-request flow with photo incentive; enable a “verified buyer” tag and photo reviews in the widget; add a Q&A block.

6. UPSELL / CROSS-SELL / BUNDLE

Current State: A cross-sell row exists at the bottom of each PDP (e.g., on Quattro: PRIMER, LIMITLESS, NEKTR with their own star ratings + ATC) — but it is **not framed as a bundle or “complete your stack,”** and there’s no bundle-discount mechanic on the PDP. The dedicated Beach Body bundle is broken (see Executive Summary).

Verdict: IMPROVE

Why: You have the cross-sell components but no incentive or narrative to lift AOV; an unframed “you might like” row converts far worse than an incentivized stack.

Benchmark: BPN “Complete Your Stack,” Transparent Labs “Complete Your Stack” with ratings, Ghost “Build Your Bundle.”

Recommended Action: Convert the cross-sell row into a “Complete Your Stack — save X%” widget with a real bundle discount applied at add-to-cart.

7. STICKY ADD-TO-CART BAR

Current State: Sticky ATC exists; on mobile it shows **only “Add to cart”** — no product thumbnail, price, or selected variant.

Verdict: IMPROVE

Why: A bare sticky button forces the user to scroll back up to confirm flavor/price before committing.

Benchmark: Ghost/Transparent Labs sticky bars carry product name, price, and variant.

Recommended Action: Add thumbnail + price + selected flavor to the sticky bar.

8. SUBSCRIPTION / RECURRING REVENUE

Current State: 15% off via deliver-every-week/2-weeks/2-months, but **defaults to one-time** and the savings/flexibility aren't sold. Subscription is absent on the bundle PDP.

Verdict: IMPROVE

Why: Defaulting off and under-selling the offer suppresses subscription take-rate — the single biggest LTV lever for a consumable.

Benchmark: Ghost, PVL, Transparent Labs all default to Subscribe & Save with explicit “cancel/pause anytime” copy.

Recommended Action: Pre-select Subscribe & Save; add “\$X.XX/order · cancel or pause any-time · skip any shipment” under the radio.

9. TRUST & RISK REVERSAL

Current State: Free shipping referenced; **no money-back guarantee, no certifications badge, no per-serving cost.**

Verdict: ADD

Why: Removing purchase risk is one of the cheapest conversion lifts available, and you're the only audited brand showing none of guarantee / third-party / per-serving.

Benchmark: 1st Phorm (money-back), BPN (NSF/GMP/3rd-party), Transparent Labs (satisfaction guarantee + clinically dosed).

Recommended Action: Add a guarantee + free-shipping-threshold + (if applicable) testing badge trust strip under the ATC, and an “as low as \$X/serving” line at the price.

10. EDUCATIONAL / CONTENT SECTION

Current State: Accordions for Features / Intended Use / Directions / Ingredients / Reviews. Functional but light on “why it works.”

Verdict: IMPROVE

Why: Magnum positions premium; the PDP doesn't carry premium-level education to justify the \$69.99 price vs. cheaper whey.

Benchmark: 1st Phorm tabs Description / Ingredients / How To Use / What To Avoid / FAQ / Research; HD Muscle leads with research.

Recommended Action: Add a short "Why 4-source protein digests better" explainer and a product-specific FAQ (mixability, lactose, when to take).

11. MOBILE PDP

Current State: Sticky ATC present (button-only), swatch selectors work, content in accordions. Page feels reasonably fast.

Verdict: IMPROVE

Why: Sticky bar lacks price/variant; sold-out swatches still occupy the thumb zone without a back-in-stock path.

Recommended Action: Enrich sticky bar; add "Notify me" on sold-out swatches.

Priority Matrix (quick wins first)

#	Recommendation	Revenue Impact	Effort	Benchmark
1	Fix Beach Body bundle (variants sold-out / ATC disabled) — restock or rebuild as a discount bundle	High	Low	BPN / TL (Transparent Labs) stacks
2	Default to Subscribe & Save + flexibility copy	High	Low	Transparent Labs, Ghost, PVL
3	Add trust strip (guarantee + free-ship threshold + testing badge) under ATC	High	Low	1st Phorm, BPN
4	Back-in-stock capture on sold-out flavors (Quattro 3/5, Limitless 1/4)	High	Low	Standard
5	Per-serving cost (“as low as \$X/serving”) at price	Med	Low	TL
6	Enrich sticky ATC (thumbnail + price + variant)	Med	Low	Ghost, TL
7	Frame cross-sell as “Complete Your Stack — save X%” with real discount	High	Med	BPN, TL
8	Outcome-led benefit bullets ATF (“zero bloat”)	Med	Low	PVL
9	Review volume program (post-purchase + photo UGC)	High	Med	1st Phorm, TL
10	Key-ingredient callout cards + structured facts (not image-only)	Med	Med	TL, BPN
11	Add mixability/lifestyle video to gallery	Med	Med	TL, HD Muscle

Feature Gap Analysis

- **Subscribe & Save defaulted ON** — Adopt — every strong competitor does it; biggest LTV lever
- **Money-back / satisfaction guarantee on PDP** — Adopt — TL & 1st Phorm show it; you show nothing

- **Third-party / NSF / GMP testing badge** — Evaluate — adopt if Magnum has testing; BPN's clearest differentiator
 - **Per-serving cost framing** — Adopt — cheap anxiety-reducer at the price point
 - **Bundle discount mechanic on PDP** — Adopt — convert the existing cross-sell row into an incentivized stack
 - **In-gallery product video** — Adopt — TL/HD Muscle/1st Phorm all have it; you have none
 - **Back-in-stock / waitlist on sold-out variants** — Adopt — you're losing demand on 3/5 Quattro flavors today
 - **Photo/UGC + Q&A in reviews** — Adopt — closes the credibility gap on low review counts
 - **Sticky ATC with price + variant** — Adopt — yours is button-only
 - **Structured (non-image) supplement facts + ingredient callouts** — Evaluate — improves scannability & transparency signal
 - **"What to avoid" / deeper education** — Evaluate — 1st Phorm/HD Muscle differentiate here; medium effort
-

Shopify-Specific Implementation Notes

Magnum is on Shopify (cdn/shop assets, product-form__submit markup, Seal/ReCharge-style selling plans confirmed).

Recommendation	Native vs. App	Suggested App	Complexity
Fix/rebuild bundle	Native (Shopify Bundles) or app	Shopify Bundles (free) or Rebuy/Fast Bundle for discounted stacks	Low–Med
Default + reframe Subscribe & Save	App (subscription)	ReCharge or Seal Subscriptions — set selling plan as default in theme + add flexibility copy	Low
Trust strip (guarantee/shipping/badges)	Native theme edit	Theme section/snippet under <code>product-form</code> (no app needed)	Low
Back-in-stock capture	App	Back in Stock / Klaviyo Back-in-Stock	Low
Per-serving cost line	Native	Liquid metafield (<code>servings</code>) → computed line in price block	Low
Enrich sticky ATC	Native theme edit	Modify sticky-cart snippet to include featured image + price + variant	Low
"Complete Your Stack" w/ discount	App	Rebuy (smart cart/bundles) or Shopify Bundles + automatic discount	Med
Review volume + photo/UGC + Q&A	App	Okendo or Loox (photo/UGC) or Judge.me ; migrate existing reviews	Med
Ingredient callout cards + structured facts	Native	Metafields + theme section (replace flat image)	Med
Gallery video	Native	Upload to Shopify product media (native video support)	Low–Med
